

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

## Achieving sustainable production of poultry meat

Volume 3: Health and welfare

Edited by Professor Todd Applegate  
University of Georgia, USA

**bd** burleigh dodds  
SCIENCE PUBLISHING

## NOW AVAILABLE

### About the book

Health and welfare are major issues in poultry production. This collection reviews our understanding of bacterial, viral and other diseases affecting poultry and their effective management. It also discusses ways of managing poultry flocks to optimise their welfare from hatching to slaughter.

### About the editor

#### Professor Todd Applegate

is Head of the Department of Poultry Science at the University of Georgia, USA. He was formerly Professor of Animal Sciences at Purdue University, USA. Professor Applegate is a former President of the Poultry Science Association (PSA). He is a recipient of the PSA's Evonik Degussa Award for Achievement in Poultry Science, American Feed Industry Association's Poultry Nutrition Research Award, and the Mapleleaf Farms Duck Research Award.

## Achieving sustainable production of poultry meat

### Vol. 3: Health and welfare

Edited by Todd Applegate, University of Georgia, USA

#### Part 1 Animal health

1. Monitoring trends in diseases of poultry: *Brian Jordan, University of Georgia, USA*
2. Gut health and susceptibility to enteric bacterial diseases in poultry: *B. M. Hargis and G. Tellez, University of Arkansas, USA; and L. R. Bielke, Ohio State University, USA*
3. Viruses affecting poultry: *Venugopal Nair, Pirbright Institute, UK*
4. Parasites affecting poultry: *Larry McDougald, University of Georgia, USA*
5. Disease management of poultry flocks: *Peter Groves, University of Sydney, Australia*
6. Understanding and boosting poultry immune systems: *Rami A. Dalloul, Avian Immunobiology Laboratory, Department of Animal and Poultry Sciences, Virginia Tech, USA*
7. Competitive exclusion (CE) treatment to control pathogens in poultry: *Carita Schneitz, Orion Pharma, Finland; and Martin Wierup, Swedish University of Agricultural Sciences (SLU), Sweden*
8. Leg disorders in poultry: bacterial chondronecrosis with osteomyelitis (BCO): *Robert F. Wideman, Jr., University of Arkansas, USA*

#### Part 2 Animal welfare

9. Understanding poultry behaviour: *M. M. Makagon and R. A.*

*Blatchford, University of California-Davis, USA*

10. Ensuring the welfare of broilers: an overview: *T. B. Rodenburg, Wageningen University, The Netherlands*
11. Broiler breeding flocks: management and animal welfare: *Ingrid C. de Jong and Rick A. van Emous, Wageningen Livestock Research, The Netherlands*
12. The effect on incubation temperature on embryonic development in poultry: *M. S. Lilburn and R. Shanmugasundaram, Ohio State University, USA*
13. The contribution of environmental enrichment to sustainable poultry production: *Inma Estevez, Neiker-Tecnalia and Ikerbasque (The Basque Foundation for Science), Spain; and Ruth C. Newberry, Norwegian University of Life Sciences, Norway*
14. Hot weather management of poultry: *Brian Fairchild, University of Georgia, USA*
15. Transportation and the welfare of poultry: *K. Schween-Lardner and T. G. Crowe, University of Saskatchewan, Canada*
16. Developments in humane slaughtering techniques for poultry: *Andy Butterworth, University of Bristol, UK*
