

Supporting research: 'Smart publishing' for a sustainable future

In this month's instalment of the Burleigh Dodds newsletter, we're sharing some very exciting news with you as we release our **publication programme** for the first time, along with giving you the chance to read an **excerpt** from one of our forthcoming chapters.

Experience

Free chapter excerpt

We are delighted to make available a free excerpt from one of our chapters, *'Advances in mycotoxin-resistant maize varieties'* which will feature in our forthcoming publication *'Achieving sustainable cultivation of maize Vol. 1'*.

You can access this free material below.

Engagement

Supporting maize research - blog

In our latest blog, Francis Dodds continues to look at **Maize** and this month focuses on supporting maize research.

Francis says: "Researchers need to keep pace with not only trends in their own fields but other areas affecting maize cultivation".

Innovation

ScholarOne™

As part of our commitment to authors Burleigh Dodds has partnered with Thomson Reuter's ScholarOne Manuscripts™ to provide an online manuscript submission tool for authors and editors.
