About the book

This collection reviews advances in understanding barley physiology and genetics, molecular breeding and cultivation techniques, as well as disease and weed management.

About the editors

Professor Glen Fox is the Anheuser-Busch Endowed Professor of Malting and Brewing Science at the University of California, USA.

Professor Chengdao Li is Director of the Western Barley Genetics Alliance, linking Murdoch University with the Department of Primary Industry and Regional Department.

Achieving sustainable cultivation of barley

Available in print and digital formats:

ISBN - print	978-1-78676-308-2
Pages	528
Pub. Date	February 2020
Price	£170/\$220/€205/C\$290
Series No	AS74

Achieving sustainable cultivation of barley

Edited by: Professor Glen Fox, University of California-Davis, USA and The University of Queensland, Australia and Professor Chengdao Li, Murdoch University, Australia

Part 1 Plant physiology and genetics

1. Advances in understanding of barley plant physiology: plant development and architecture: *Andrea Visioni, International Center for Agricultural Research in the Dry Areas (ICARDA), Morocco*
2. Advances in understanding barley plant physiology: responses to abiotic stress: *Alessandro Tondelli, Cristina Crosatti, Stefano Delbono and Luigi Cattivelli, CREA Research Centre for Genomics and Bioinformatics, Italy*
3. Advances in the understanding of barley plant physiology: factors determining grain development, composition and chemistry: *Ljudmilla Borisjuk, Hardy Rolletschek and Volodymyr Radchuk, Leibniz Institute of Plant Genetics and Crop Plant Research (IPK), Germany*
4. Exploring barley germplasm for yield improvement under sulphur limiting environments: *Tefera Tolera Angessa, Murdoch University, Australia; Kefei Chen, Curtin University, Australia; David Farleigh, Jenifer Bussanich and Lee-Anne McFawn, Department of Primary Industries and Regional Development-Western Australia, Australia; Kevin Whitfield, CSBP Limited, Australia; Brendon Weir, Mullewa, Australia; Steve Cosh, Department of Primary Industries and Regional Development-Western Australia, Australia; et al.*
5. Mapping and exploiting the barley genome: techniques for mapping genes and relating them to desirable traits: *Hélène Pidon and Nils Stein, Leibniz Institute of Plant Genetics and Crop Plant Research (IPK), Germany*

Part 2 Advances in breeding

6. Advanced designs for barley breeding experiments: *Alison Kelly, Queensland Department of Agriculture and Fisheries and Queensland Alliance for Agriculture and Food Innovation (QAAFI), The University of Queensland, Australia; and Clayton Forknall, Queensland Department of Agriculture and Fisheries, Australia*
7. Advances in molecular breeding techniques for barley: genome-wide association studies (GWAS): *W. T. B. Thomas, James Hutton Institute, UK*

8. Advances in molecular breeding techniques for barley: targeted induced local lesions in genomes (TILLING): *Serena Rosignoli and Silvio Salvi, University of Bologna, Italy*

Part 3 Cultivation techniques, pest and disease management

9. Advances in postharvest storage and handling of barley: methods to prevent or reduce mycotoxin contamination: *Zhao Jin and Paul Schwarz, North Dakota State University, USA*
10. Fungal diseases affecting barley: *Robert S. Brueggeman, Shyam Solanki, Gazala Ameen and Karl Effertz, Washington State University, USA; Roshan Sharma Poudel, North Dakota State University, USA; and Aziz Karakaya, Ankara University, Turkey*
11. Integrated disease management of barley: *Adrian C. Newton, James Hutton Institute and SRUC, UK; and Henry E. Creissen, Neil D. Havis, and Fiona J. Burnett, SRUC, UK*
12. Integrated weed management in barley cultivation: *Michael Widderick, Queensland Department of Agriculture and Fisheries, Australia*

Part 4 Quality

13. Developing barley crops for improved malt quality: *Glen Fox, University of California-Davis, USA and The University of Queensland, Australia; and Reg Lance, Queensland Department of Agriculture and Fisheries, Australia*
14. Developing barley crops for improved brewing quality: *Søren Knudsen, Finn Lok and Ilka Braumann, Carlsberg Research Laboratory, Denmark*
15. Optimising the use of barley as an animal feed: *David M. E. Poulsen, Queensland University of Technology, Australia*
16. Nutritional and bioactive compounds in barley: *Nancy Ames, Joanne Storsley, Lovemore Malunga and Sijo Joseph Thandapilly, Agriculture and Agri-Food Canada, Canada*
