

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

Reconciling agricultural production with biodiversity conservation

Edited by Professor Paolo Bärberi and Dr Anna-Camilla Moonen, Institute of Life Sciences – Scuola Superiore Sant'Anna, Italy

AVAILABLE NOW

About the book

The first part of this volume assesses general issues such as landscape approaches, mapping and assessing the economic value of biodiversity. Part 2 reviews management practices promoting biodiversity such as field margins, hedgerows, improved pasture management and agroforestry.

About the editors

Dr Paolo Bärberi is Professor of Agronomy and Field Crops and Head of the Agroecology Group at the Scuola Superiore Sant'Anna (SSSA), Italy.

Dr Anna-Camilla Moonen is an Assistant Professor in Agronomy and Field Crops at the Scuola Superiore Sant'Anna (SSSA), Italy.

Reconciling agricultural production with biodiversity conservation

Available in print and digital formats:

ISBN - print 978-1-78676-348-8

Pages 282

Pub. Date September 2020

Price £150/\$195/€180/C\$255

Series No AS87

Reconciling agricultural production with biodiversity conservation

Edited by: Professor Paolo Bàrberi and Dr Anna-Camilla Moonen, Institute of Life Sciences - Scuola Superiore Sant'Anna, Italy

Part 1 Methods to study biodiversity in agroecosystems

1. The challenge of monitoring biodiversity in agricultural landscapes at the EU level: *M. L. Paracchini, European Commission, Joint Research Centre (JRC), Italy; S. Condé, European Topic Centre on Biological Diversity – Muséum National d'Histoire Naturelle, France; R. D'Andrimont, European Commission, Joint Research Centre (JRC), Italy; B. Eiselt, European Commission, Eurostat, Luxembourg, Luxembourg; O. Fernandez Ugalde, E. Gervasini and A. Jones, European Commission, Joint Research Centre (JRC), Italy; V. Kovacevic, European Commission, DG Environment, Belgium; R. Oppermann, Institut für Agrarökologie und Biodiversität (IFAB), Germany; A. Orgiazzi, M. Van der Velde, C. Polce and C. Rega, European Commission, Joint Research Centre (JRC), Italy; C. Van Swaay, De Vlinderstichting, The Netherlands; and P. Voříšek, Czech Society for Ornithology, Czech Republic*
2. Modelling biodiversity in agriculture: *G. R. Squire, James Hutton Institute, UK*
3. Assessing the economic value of agricultural biodiversity: a critical perspective: *Corrado Topi, Stockholm Environment Institute at York, Department of Environment and Geography and Interdisciplinary Global Development Centre, University of York, UK; and Leonie J. Pearson, Stockholm Environment Institute, Thailand*
4. Functional biodiversity for the provision of agroecosystem services: *Paolo Bàrberi and Anna-Camilla Moonen, Institute of Life Sciences – Scuola Superiore Sant'Anna, Italy*

Part 2 Management practices to support agroecosystem services

5. The role of field margins in biodiversity conservation in agroecosystems: *Alicia Cirujeda and Gabriel Pardo, Centro de Investigación y Tecnología Agroalimentaria de Aragón (CITA-Universidad de Zaragoza), Spain*
6. The role of hedgerows in supporting biodiversity and other ecosystem services in intensively managed agricultural landscapes: *Audrey Alignier, Léa Uroy and Stéphanie Aviron, INRAE, France*
7. Reconciling production and biodiversity in management of pastures and grasslands: *Sylvain Plantureux, Université de Lorraine, INRAE, LAE, France*
8. The importance of agroforestry systems in supporting biodiversity conservation and agricultural production: a European perspective: *M. R. Mosquera-Losada, J. J. Santiago-Freijanes, A. Rigueiro-Rodríguez, F. J. Rodríguez-Rigueiro, D. Arias Martínez, A. Pantera and N. Ferreiro-Domínguez, University of Santiago de Compostela, Spain* *postharvest management of staple grains: the role of loss reduction technologies: Brighton M. Mvumi, University of Zimbabwe, Zimbabwe; and Tanya Stathers, Natural Resources Institute (NRI) – University of Greenwich, UK*
