

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

## Microbial bioprotectants for plant disease management

Edited by Dr Jürgen Köhl, Wageningen University & Research,  
The Netherlands

Dr Willem J. Ravensberg, Koppert Biological Systems,  
The Netherlands

 burleigh dodds  
SCIENCE PUBLISHING

## AVAILABLE NOW

### About the book

This collection provides a comprehensive coverage of the recent advances in the development of more ecologically balanced biological methods to control plant diseases. Chapters review the availability and use of bacterial, fungal and viral bioprotectants, as well as the issues that arise with their development and use.

### About the editors

**Dr Jürgen Köhl** is a Senior Scientist in Plant Pathology at Wageningen University & Research, The Netherlands with an international reputation in biological control of pests.

**Dr Willem J. Ravensberg** is Corporate Senior Regulatory and Governmental Affairs Manager at Koppert Biological Systems.

### Microbial bioprotectants for plant disease management

Available in print and digital formats:

ISBN - print 978-1-78676-813-1

Pages 734

Pub. Date November 2021

Price £150/\$195/€180/C\$255

Series No AS108

# Microbial bioprotectants for plant disease management

Edited by: Dr Jürgen Köhl, Wageningen University & Research, The Netherlands and Dr Willem J. Ravensberg, Koppert Biological Systems, The Netherlands

## Part 1 Product development of microbials

1. Advances in understanding modes of action of microbial bioprotectants: *Gabriele Berg, Graz University of Technology and Austrian Centre of Industrial Biotechnology, Austria; Peter Kusstatscher, Franz Stocker and Ahmed Abdelfattah, Graz University of Technology, Austria; and Tomislav Cernava, Graz University of Technology and Austrian Centre of Industrial Biotechnology, Austria*
2. Advances in screening approaches for the development of microbial bioprotectants to control plant diseases: *Wagner Bettiol, Embrapa (Brazilian Agricultural Research Corporation), Brazil; Flávio Henrique Vasconcelos de Medeiros, Universidade Federal de Lavras, Brazil; Josiane Barros Chiaromonte, Vittia Fertilizantes e Biológicos SA, Brazil; and Rodrigo Mendes, Embrapa (Brazilian Agricultural Research Corporation), Brazil*
3. Visualising plant colonisation by beneficial bacteria: a key step to improve the understanding of plant–microbe interactions: *Stéphane Compant, Günter Brader and Angela Sessitsch, AIT Austrian Institute of Technology GmbH, Austria*
4. Durability of efficacy of microbial bioprotectants against plant diseases: *Marc Bardin, Thomas Pressecq and Philippe C. Nicot, INRAE, Pathologie Végétale, Avignon, France; and Yoursa Bouaoud, University of Bejaia, Algeria*
5. Advances in production and formulation of commercial microbial bioprotectant products: *Jacob Eyal, Michael Dimock, and José João Carvalho, Certis USA LLC, USA*
6. Key issues in the regulation of microbial bioprotectants in the European Union: challenges and solutions to achieve more sustainable crop protection: *Rüdiger Hauschild, APIS Applied Insect Science GmbH, Germany; and Willem J. Ravensberg, Koppert Biological Systems, The Netherlands*
7. Microbial bioprotectants and the marketplace: *Mark C. Trimmer, DunhamTrimmer LLC, USA*

## Part 2 Biological control agents

8. The use of *Bacillus* spp. as bacterial biocontrol agents to control plant diseases: *Adrien Anckaert, Anthony Arguelles Arias and Grégory Hoff, Gembloux Agro-Bio Tech, ULiège (University of Liège), Belgium; Maryline Calonne-Salmon and Stéphane Declerck, UCLouvain (University of Louvain-la-Neuve), Belgium; and Marc Ongena, Gembloux Agro-Bio Tech, ULiège (University of Liège), Belgium*
9. The use of *Pseudomonas* spp. as bacterial biocontrol agents to control plant diseases: *Monica Höfte, Ghent University, Belgium*

10. Are there bacterial bioprotectants besides *Bacillus* and *Pseudomonas* species?: *Emilio Montesinos and Anna Bonaterra, Institute of Food and Agricultural Technology, University of Girona, Spain*
11. The use of *Trichoderma* spp. to control plant diseases: *Enrique Monte and Rosa Hermosa, Spanish-Portuguese Institute for Agricultural Research (CIALE) – University of Salamanca, Spain*
12. *Clonostachys rosea* to control plant diseases: *Dan Funck Jensen and Mukesh Dubey, Swedish University of Agricultural Sciences, Sweden; Birgit Jensen, University of Copenhagen, Denmark; and Magnus Karlsson, Swedish University of Agricultural Sciences, Sweden*
13. Bacteriophages to control plant diseases: *Manoj Choudhary and Mathews Paret, University of Florida and North Florida Research and Education Center, IFAS, University of Florida, USA; Aleksa Obradović, University of Belgrade, Serbia; Katarina Gašić, Institute for Plant Protection and Environment, Serbia; and Jeffrey B. Jones, University of Florida, USA*
14. The use of mild viruses for control of plant pathogenic viruses: *Nelia Ortega-Parra, De Ceuster Meststoffen BV (DCM) and Wageningen University & Research, The Netherlands; Zafeiro Zisi, Scientia Terrae Research Institute VZW and Katholieke Universiteit Leuven, Belgium; and Inge M. Hanssen, De Ceuster Meststoffen NV (DCM), Belgium*
15. Biocontrol via mycoviruses, a neglected option for biocontrol?: *Anne D. van Diepeningen, BU Biointeractions and Plant Health, Wageningen University and Research, The Netherlands*

## Part 3 Examples of use of bioprotectants

16. Development and scale-up of bioprotectants to keep staple foods safe from aflatoxin contamination in Africa: *Ranjit Bandyopadhyay, Alejandro Ortega-Beltran, Matieyedou Konlambigue, Lawrence Kaptoge and Titilayo D. O. Falade, International Institute of Tropical Agriculture, Nigeria; and Peter J. Cotty, Ocean University of China, China*
17. Using *Verticillium albo-atrum* WCS850 to control Dutch elm disease: *Joeke Postma, Wageningen University & Research, The Netherlands*

## Part 4 Future outlook on bioprotectants

18. The role of bioprotectants for disease control in integrated crop protection approaches: *Jürgen Köhl, Wageningen University & Research, The Netherlands*
19. Future outlook on microbial bioprotectants in agriculture: *Willem J. Ravensberg, Koppert Biological Systems, The Netherlands*
