

Interested in controlled environment agriculture?

Browse our selection of titles that cover topics such as:

- Vertical farming
- Light-emitting diode (LED) lighting systems
- Protected cultivation
- Hydroponics
- Plant factories with artificial lighting (PFALs)
- Controlled climates
- Automation and robotics
- Greenhouse
- Decision support systems
- Rooftop farming systems

Discover more on vertical farming...

This specially curated collection features five reviews of current and key research on vertical farming in horticulture and covers:

- Indoor lighting systems
- Nutrients for hydroponic systems
- Aeroponics
- Plant factories with artificial lighting (PFALs)
- Soilless cultivation
- Nutrient solutions
- Crop nutrition
- Substrates
- Sustainability
- Production costs of vertical farming systems
