

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

Achieving sustainable greenhouse cultivation

Edited by Professor Leo F. M. Marcelis and Dr Ep Heuvelink
Wageningen University, The Netherlands

SCIENCE PUBLISHING

AVAILABLE NOW

About the book

Greenhouse and other forms of protected cultivation create controlled environments to offset climate change and optimise resource use. This collection provides a comprehensive review of key advances in greenhouse and other forms of protected and controlled environment cultivation.

About the editors

Professor Leo Marcelis is Head of the Horticulture and Product Physiology Group at Wageningen University, The Netherlands.

Dr Ep Heuvelink is Associate Professor in the Horticulture and Product Physiology Group at Wageningen University and is well known for his work on crop physiology.

Achieving sustainable greenhouse cultivation

Available in print and digital formats:

ISBN - print 978-1-78676-280-1

Pages 538

Pub. Date September 2019

Price £170/\$220/€205/C\$290

Series No AS63

Achieving sustainable greenhouse cultivation

Edited by: Professor Leo F. M. Marcelis and Dr Ep Heuvelink, Wageningen University, The Netherlands

1. Achieving sustainable greenhouse production: present status, recent advances and future developments: *Leo F. M. Marcelis, Wageningen University, The Netherlands; Joaquim Miguel Costa, Universidade de Lisboa, Portugal; and Ep Heuvelink, Wageningen University, The Netherlands*

Part 1 Production systems

2. Advances in greenhouse design: *Juan I. Montero, formerly Institut de Recerca i Tecnologia Agroalimentaries, Spain*
3. Advances in screenhouse design and practice for protected cultivation: *Josef Tanny, Agricultural Research Organization – Volcani Center, Israel*
4. Aquaponic systems for crop cultivation: *B. W. Alsanus and S. Khalil, Swedish University of Agricultural Sciences (SLU), Sweden; A. Tadesse, Debre Berhan University, Ethiopia; A. K. Rosberg, K. J. Bergstrand, R. Hartmann, L. Mogren, M. Alam, M. Grudén and T. Naznin, Swedish University of Agricultural Sciences (SLU), Sweden; and A. Getahun, Addis Ababa University, Ethiopia*
5. Advances in organic greenhouse cultivation: *Martine Dorais, Université Laval, Canada*
6. Towards sustainable plant factories with artificial lighting (PFALs): from greenhouses to vertical farms: *Toyoki Kozai, Japan Plant Factory Association, Japan; Yumiko Amagai, Chiba University, Japan; and Eri Hayashi Japan Plant Factory Association, Japan*

Part 2 Crop management

7. Understanding crop responses to controlled climates in greenhouses: *Chieri Kubota, The Ohio State University, USA*
8. Developments in growing substrates for greenhouse cultivation: *Youbin Zheng, University of Guelph, Canada*
9. Advances in irrigation management in greenhouse cultivation: *Stefania De Pascale, University of Naples Federico II, Italy; Luca Incrocci, University of Pisa, Italy; Daniele Massa, Council for Agricultural Research and Economics, Italy; Youssef Roupheal, University of Naples Federico II, Italy; and Alberto Pardossi, University of Pisa, Italy*

10. Advances in nutrient management in greenhouse cultivation: *Neil S. Mattson, Cornell University, USA; and Christopher J. Currey, Iowa State University, USA*
11. Advances in pest and disease management in greenhouse cultivation: *Gerben J. Messelink and H. Marjolein Kruidhof, Wageningen University and Research, The Netherlands*

Part 3 System management

12. Automation and robotics in greenhouses: *E. J. van Henten, Wageningen University and Research, The Netherlands*
13. Models, sensors and decision support systems in greenhouse cultivation: *Oliver Körner, Leibniz Institute of Vegetable and Ornamental Crops (IGZ), Germany*
14. Assessing the impact of environmental factors on the quality of greenhouse produce: *Nazim Gruda, University of Bonn, Germany*
15. Sustainable use of energy in greenhouses: *S. Hemming, J. C. Bakker, J. B. Campen and F. L. K. Kempkes, Wageningen University and Research, The Netherlands*
16. Assessing the environmental impact of greenhouse cultivation: *Assumpció Antón, Erica Montemayor and Nancy Peña, Institute of Agrifood Research and Technology (IRTA), Spain*

What others are saying about Greenhouse cultivation...

“This much anticipated publication will be highly valued by the international protected cropping industry. The subjects explored reflect the modern face of sustainable horticultural production and the book is a key example of the necessary collaboration between the knowledge makers and the knowledge users.”
