

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

## Integrated management of insect pests

Current and future developments

Edited by Emeritus Professor Marcos Kogan, Oregon State University, USA

Emeritus Professor E. A. Heinrichs, University of Nebraska-Lincoln, USA

 burleigh dodds

## AVAILABLE NOW

### About the book

This volume reviews current developments in integrated pest management (IPM), focussing on insect pests. It discusses advances in understanding species and landscape ecology on which IPM is founded, as well as advances in cultural, physical and biological methods of control.

### About the editors

**Dr Marcos Kogan** is Emeritus Professor of Entomology and Director Emeritus of the Integrated Plant Protection Center at Oregon State University, USA.

**Dr E. A. Heinrichs** is Emeritus Associate Director, University of Nebraska-Lincoln. He is also Secretary General for the International Association for the Plant Protection Sciences (IAPPS).

### Integrated management of insect pests: Current and future developments

Available in print and digital formats:

ISBN - print 978-1-78676-260-3

Pages 1004

Pub. Date October 2019

Price £210/\$275/€250/C\$360

Series No AS69

# Integrated management of insect pests: Current and future developments

Edited by: Emeritus Prof. Marcos Kogan, Oregon State University, USA and Emeritus Prof. E. A. Heinrichs, University of Nebraska-Lincoln, USA

## Part 1 Ecological foundations of IPM

1. Foundations of an IPM program: detection, identification, and quantification: *Michael E. Irwin, University of Illinois, USA; and Wendy Moore, University of Arizona, USA*
2. Advances in understanding species ecology: phenological and life cycle modeling of insect pests: *Leonard Coop and Brittany S. Barker, Oregon State University, USA*
3. Understanding agroecosystems and pest management: from chemical control to integrated biodiversity management: *Keizi Kiritani, formerly National Institute of Agro-Environmental Sciences, Japan*
4. Advances in understanding agroecosystems ecology and its applications in integrated pest management: *Casey Hoy, Ohio State University, USA*
5. Advances in understanding the ecology of invasive crop insect pests and their impact on IPM: *Robert Venette, USDA Forest Service, USA; and Amy Morey, University of Minnesota, USA*
6. Plant-insect interactions, host-plant resistance, and integrated pest management: *Michael J. Stout, Louisiana State University Agricultural Centre, USA*

## Part 2 Cultural and physical methods in IPM

7. Advances in breeding crops resistant to insect pests: rice as a paradigm: *E. A. Heinrichs and John E. Foster, University of Nebraska-Lincoln, USA*
8. The role and use of genetically engineered insect-resistant crops in integrated pest management systems: *Steven E. Naranjo and Richard L. Hellmich, USDA-ARS, USA; Jörg Romeis, Agroscope, Switzerland; Anthony M. Shelton, Cornell University, USA; and Ana M. Vélez, University of Nebraska-Lincoln, USA*
9. Biotechnology applications for integrated pest management: *Ruth Mbabazi and Karim Maredia, Michigan State University, USA*
10. Advances in physical control methods in IPM: *Charles Vincent, Agriculture Agri-Food Canada Saint-Jeansur-Richelieu, Canada; Guy Hallman, Phytosanitation, Oceanside, USA; Phyllis Weintraub, Gilat Research Center, Israel; and Francis Fleurat-Lessard, Gradignan, France*
11. Robot-enhanced insect pest control: reality or fantasy?: *Linton Winder, The BHU Future Farming Centre, New Zealand; and Rory Flemmer, Junior Enterprises, New Zealand*

## Part 3 Biological methods in IPM

12. Advances in classical biological control to support IPM of perennial agricultural crops: *Ivan Milosavljević and Mark S. Hoddle, University of California-Riverside, USA*
13. Advances in conservation biological control and habitat management for IPM: *Prisila A. Mkenda, Charles Sturt University, Australia and The Nelson Mandela African Institution of Science and Technology, Tanzania; Sunita Pandey and Anne C. Johnson, Charles Sturt University, Australia and Graham Centre, Australia; and Geoff M. Gurr, Charles Sturt University, Australia, Graham Centre, Australia and Fujian Agriculture and Forestry University and Ministry of Education, China*

14. Advances in augmentative biological control in integrated pest management: *Joop C. van Lenteren, Wageningen University, The Netherlands; and Vanda H. P. Bueno, Federal University of Lavras, Brazil*
15. Integrated pest management (IPM) in greenhouse and other protected environments: *Margaret Skinner, Cheryl Frank Sullivan and Bruce L. Parker, University of Vermont, USA*
16. Advances in microbial control in integrated pest management: entomopathogenic fungi: *Travis Glare and Aimee McKinnon, Lincoln University, New Zealand; Roma Gwynn, Rationale, UK; and Michael Brownbridge, Vineland Research and Innovation Centre, Canada*
17. Advances in microbial control in IPM: entomopathogenic viruses: *Sean Moore, Citrus Research International and Rhodes University, South Africa; and Michael Jukes, Rhodes University, South Africa*
18. Advances in use of entomopathogenic nematodes in integrated pest management: *David Shapiro-Ilan, USDA-ARS, USA; Selcuk Hazir, Adnan Menderes University, Turkey; and Itamar Glazer, Volcani Center, Israel*

## Part 4 Chemical methods in IPM

19. Chemical control in IPM systems: advances in selective pesticides and application systems: *Graham Matthews, Imperial College London, UK*
20. Ecological impacts of pesticides and their mitigation within IPM systems: *Linda J. Thomson and Ary A. Hoffmann, University of Melbourne, Australia*
21. Monitoring and minimizing health risks related to pesticides: *Keith Tyrell and Sheila Willis, Pesticide Action Network UK (PAN UK), UK and University of Cape Town, South Africa; Stephanie Williamson, Pesticide Action Network UK (PAN UK), UK; Davo Simplicie Vodouhe, Organisation Béninoise pour la Promotion de l'Agriculture Biologique (OBEPAB) and Université d'Abomey-Calavi, Benin; and Anthony Youdeowei, Pesticide Action Network UK (PAN UK) and University of Greenwich, UK*
22. Peptide-based biopesticides: *Shireen Davies, Rob Liskamp and Julian Dow, University of Glasgow, UK*

## Part 5 Implementation

23. Integrated pest management (IPM) of nematodes: *Hendrika Fourie and Dirk De Waele, North-West University, South Africa*
24. Integrated pest management of mites: *Oscar E. Liburd, Lorena Lopez, Daniel Carrillo, Alexandra M. Reynthi and Omotola Olaniyi, University of Florida, USA; and Rana Akyazi, Ordu University, Turkey*
25. Economic assessment of integrated pest management (IPM) implementation: *George B. Frisvold, University of Arizona, USA*
26. The synergism of biocontrol and plant resistance: a path to advance IPM to higher levels of integration: *Marcos Kogan, Oregon State University, USA*
