About the book

This volume reviews advances in on-farm herd health management to prevent and limit disease amongst dairy cattle. It surveys advances in disease epidemiology and monitoring, ways of optimising cattle immune function as well as enhancing health at different stages in the life cycle.

About the editor

Dr Émile Bouchard is a Professor Emeritus at the Faculty of Veterinary Medicine of the University of Montreal, Saint-Hyacinthe, Québec, Canada. Professor Bouchard is current President of the World Association for Buiatrics and is internationally known for his research on dairy cattle medicine and herd health.

Improving dairy herd health

Available in print and digital formats:

ISBN - print 978-1-78676-467-6

Pages 490

Pub. Date July 2021

Price £150/\$195/€180/C\$255

Series No AS102

Improving dairy herd health

Edited by: Professor Emeritus Émile Bouchard, University of Montreal, Canada

Part 1 Principles

1. Key issues in dairy herd health management: *John Remnant, James Breen, Peter Down, Chris Hudson and Martin Green, University of Nottingham, UK*
2. Key issues and challenges in disease surveillance in dairy cattle: *Lorenzo E. Hernández-Castellano, Klaus L. Ingvarlsen and Mogens A. Krogh, Aarhus University, Denmark*
3. Advances in techniques for health monitoring/disease detection in dairy cattle: *Michael Iwersen and Marc Drillich, University of Veterinary Medicine Vienna, Austria*
4. Data-driven decision support tools in dairy herd health: *Victor E. Cabrera, University of Wisconsin-Madison, USA*

Part 2 Prerequisites

5. Advances in understanding immune response in dairy cattle: *Bonnie Mallard, Mehdi Emam, Shannon Cartwright, Tess Altvater-Hughes, Alexandra Livernois, Lauri Wagter-Lesperance, Douglas C. Hodgins and Heba Atalla, University of Guelph, Canada; Brad Hine, CSIRO Livestock & Aquaculture, Australia; Joshua Aleri, Murdoch University, Australia; and Andrew Fisher, University of Melbourne, Australia*
6. Dairy cattle welfare and health: an intimate partnership: *Clive Phillips, Curtin University Sustainable Policy (CUSP) Institute, Australia*

Part 3 Health at different stages in the life cycle

7. Optimising reproductive management to maximise dairy herd health and production: *Norman B. Williamson, Massey University, New Zealand*
8. Managing dry cow udder health: *Päivi J. Rajala-Schultz, University of Helsinki, Finland; and Tariq Halasa, University of Copenhagen, Denmark*
9. Managing calves/young stock to optimise dairy herd health: *John F. Mee, Teagasc, Ireland*
10. Managing replacement and culling in dairy herds: *Albert De Vries, University of Florida, USA*

Part 4 Particular health issues

11. Optimising udder health in dairy cattle: *Theo J. G. M. Lam, Royal GD Animal Health and Utrecht University, The Netherlands; and Sarne De Vliegheer, M-team, Ghent University and MEX™, Belgium*
12. Optimising foot health in dairy cattle: *Nick J. Bell, The University of Nottingham, UK*
13. Preventing bacterial diseases in dairy cattle: *Sharif S. Aly and Sarah M. Dejenbrock, University of California-Davis, USA*
