

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

## Achieving sustainable cultivation of maize

Volume 1: From improved varieties to local applications

Edited by Dr Dave Watson, CGIAR Maize Research Program Manager, CIMMYT, Mexico

 burleigh dodds  
SCIENCE PUBLISHING

## NOW AVAILABLE

### About the book

Maize is one of the most important and widely grown cereal crops in the world and is a staple food for almost a billion people. This volume focuses on breeding new varieties with desirable traits such as improved nutritional value as well as how such innovations can be successfully deployed in the developing world.

### About the editor

**Dr Dave Watson** is Programme Manager for the CGIAR Research Program on MAIZE, based at the International Maize and Wheat Improvement Center (CIMMYT).

## Achieving sustainable cultivation of maize - Vol.1

### From improved varieties to local applications

Edited by: Dave Watson, CGIAR Maize Research Program Manager, CIMMYT, Mexico

#### Part 1 Genetic diversity and breeding

1. Ensuring the genetic diversity of maize and its wild relatives: *J. Stephen Smith, Iowa State University, USA; Candice A. C. Gardner, USDA-ARS/Iowa State University, USA; and Denise E. Costich, CIMMYT Germplasm Bank (Maize Collection), Mexico*
2. Key challenges in maize breeding in sub-Saharan Africa: *Baffour Badu-Apraku, IITA, Nigeria; M.A.B. Fakorede and R.O. Akinwale, Obafemi Awolowo University, Ile-Ife, Nigeria*
3. Developing maize-breeding methods and cultivars to meet the challenge of climate change: *Marcelo J. Carena, North Dakota State University, USA*
4. Understanding and improving protein traits in maize: *Yongrui Wu, National Key Laboratory of Plant Molecular Genetics, CAS Center for Excellence in Molecular Plant Sciences, Institute of Plant Physiology & Ecology, Shanghai Institutes for Biological Sciences, Chinese Academy of Sciences, China; and Joachim Messing, Waksman Institute of Microbiology, Rutgers University, USA*
5. Advances in mycotoxin-resistant maize varieties: *Marilyn L. Warburton and W. Paul Williams, USDA-ARS Corn Host Plant Research Resistance Unit, USA*
6. Advances in cold-tolerant maize varieties: *Csaba L. Marton and Zsuzsanna Tóthné Zsuzsori, MTA Centre for Agricultural Research, Hungary*

#### Part 2 Understanding and improving maize nutritional and sensory quality

7. Nutritional and nutraceutical/functional properties of maize: *Dharam Paul Chaudhary, Indian Institute of Maize Research*

*(IIMR), India*

8. Biofortification of maize: *Eliab Simpungwe, HarvestPlus, Zambia*
9. Assessing and improving the nutritional quality of maize: *Elena Lima-Cabello and Paula Robles Bolivar, Spanish National Research Council (CSIC), Spain and Jose C. Jimenez-Lopez, Spanish National Research Council (CSIC), Spain and The University of Western Australia, Australia*
10. Analysing maize grain quality: *Glen P. Fox and Tim J. O'Hare, the University of Queensland, Australia*

#### Part 3 Translating research into practice: improving maize cultivation in the developing world

11. Constraints in adopting improved technologies for maize cultivation: the case of Africa: *T. Abdoulaye, The International Institute of Tropical Agriculture (IITA), Nigeria; A. S Bamire and A. A. Akinola, Obafemi Awolowo University, Nigeria; and A. Alene, A. Menkir and V. Manyong, The International Institute of Tropical Agriculture (IITA), Nigeria*
12. Supporting small holders in maize cultivation: using an agricultural innovation systems approach: *Mariana Wongtschowski and Remco Mur, Royal Tropical Institute (KIT), The Netherlands; and Carolina Camacho, the International Maize and Wheat Improvement Center (CIMMYT), Mexico*
13. Women and maize cultivation: increasing productivity through gender analysis: *Cheryl Doss, Oxford University, UK*
