About the book

Mangoes are grown widely across Asia, Africa, the Americas and Southern Europe. This volume summarises the wealth of recent research on enhancing mango cultivation. Topics include developments in understanding mango genetics and breeding as well as cultivation, pest and disease management.

About the editors

Dr Víctor Galán Saúco is Research Professor (Emeritus) at the Instituto Canario de Investigaciones Agrarias (ICIA), Spain where he was Head of Research from 1980 to 2006. He is widely regarded as one of the world's leading experts on mangoes.

Dr Ping Lu is a Fellow in the Research Institute for the Environment and Livelihoods at Charles Darwin University, Australia. He is the current Chair of the Mango Working Group of the ISHS and a Principal Plant Ecologist at ERA (Energy Resources of Australia).

Achieving sustainable cultivation of mangoes

Available in print and digital formats:

ISBN - print 978-1-78676-132-3

Pages 420

Pub. Date December 2017

Price £200/\$250/€240/C\$340

Series No AS34

Achieving sustainable cultivation of mangoes

Edited by: Dr Victor Galán Saúco, Instituto Canario de Investigaciones Agrarias (ICIA), Spain
and Dr Ping Lu, Charles Darwin University, Australia

Part 1 Genetic improvement and plant physiology

1. Exploiting the mango genome: molecular markers: V. Pérez and J. I. Hormaza, Instituto de Hortofruticultura Subtropical y Mediterránea La Mayora (IHSM La Mayora - CSIC - UMA), Spain
2. The genetic diversity of mangoes: Noris Ledesma, Fairchild Tropical Botanic Garden - Florida, USA
3. Mango cultivars of the world: a review: Shailendra Rajan, Central Institute for Subtropical Horticulture (CSIH), India
4. Advances in understanding mango tree growth and canopy development: Frédéric Normand, UR HortSys, France; Pierre-Éric Lauri, INRA, France
5. Advances in understanding flowering, pollination and fruit development in mangoes: María Hilda Pérez-Barraza and Jorge Alberto Osuna-Gracia, Instituto Nacional de Investigaciones Forestales Agrícolas y Pecuarias, Mexico

Part 2 Cultivation techniques

6. Mango cultivation practices in the tropics: good agricultural practices to maximise sustainable yields: Sisir Mitra, International Society for Horticultural Science, India and A. Bhagwan, Fruit Research Station, Sangareddy, India
7. Mango cultivation practices for the subtropics: Víctor Galán Saúco, Instituto Canario de Investigaciones Agrarias, Spain
8. Mango cultivation in greenhouses: John Y. Yonemoto, Japan Tropical Fruit Association, Japan
9. Managing an ultra high-density mango orchard and small-tree growing systems: Steven A. Oosthuysen, HortResearch SA, South Africa
10. Organic mango production: a review: Víctor Manuel Medina-Urrutia and Jaime Eduardo Reyes-Hernández, CUCBA-Universidad de Guadalajara, Mexico; Marciano Manuel Robles-González, INIFAP-

Campo Experimental Tecomán, Mexico; and Gil Virgen-Calleros and Enrique Pimienta-Barrios, CUCBA-Universidad de Guadalajara, Mexico

11. Improving fertilizer and water use efficiency in mango cultivation: A. G. Levin, AgroWebLab Ltd., Israel

Part 3 Post-harvest management

12. Monitoring fruit quality and quantity in mangoes: Kerry Walsh, Central Queensland University, Australia
13. Understanding post-harvest deterioration of mangoes: Apiradee Uthairatanakij and Pongphen Jitareerat, King Mongkut's University of Technology Thonburi, Thailand; Robert E. Paull, University of Hawaii at Manoa, USA
14. Post-harvest storage management of mango fruit: Noam Alkan, Agricultural Research Organization (ARO), Volcani Center, Israel and Anirudh Kumar, ARO, Israel and Indira Gandhi National Tribal University (IGNTU), India
15. The nutritional and nutraceutical/functional properties of mangoes: Laurent Urban, University of Avignon, France; Mônica Maria de Almeida Lopes and Maria Raquel Alcântara de Miranda, Federal University of Ceará, Brazil
16. Life cycle assessment of mango systems: Claudine Basset-Mens; Sandra Payen; Henri Vannière; Angela Braun; Yannick Bard, CIRAD, France

Part 4 Diseases and pests

17. Integrated disease management in mango cultivation: Randy C. Ploetz, University of Florida, USA
18. Integrated pest management/biological pest control strategies in mango cultivation: Stefano De Faveri, Queensland Department of Agriculture and Fisheries, Australia
