NOW PUBLISHED!

About the book

The livestock sector must assess how animal welfare can be improved whilst ensuring livestock production remains economically and environmentally sustainable. This collection reviews the genetic and developmental factors that affect pig behaviour and assesses ways of optimising pig welfare at different stages of production, from breeding to slaughter.

About the editor

Dr Sandra Edwards is Emerita Professor in the School of Natural and Environmental Sciences at Newcastle University, UK. Professor Edwards is widely regarded as one of the world's leading experts on pig welfare with over 200 publications in the field. She has won numerous awards, including from organisations such as UFAW, EAAP, RSPCA and BSAS.

Understanding the behaviour and improving the welfare of pigs

Available in print and digital formats:

ISBN - print	978-1-78676-443-0
Pages	598
Pub. Date	February 2021
Price	£150/\$195/€180/C\$255
Series No	AS96

Understanding the behaviour and improving the welfare of pigs

Edited by: Emerita Professor Sandra Edwards, Newcastle University, UK

Part 1 Determinants of behaviour

1. Advances in understanding the genetics of pig behaviour: *Lotta Rydhmer, Swedish University of Agricultural Sciences, Sweden*
2. Developmental influences on pig behaviour: *Giuliana Miguel-Pacheco and Yolande M. Seddon, University of Saskatchewan, Canada*

Part 2 Management of behaviour in different production stages

3. Optimising pig welfare in breeding and gestation: *Paul H. Hemsworth, University of Melbourne, Australia*
4. Optimising sow and piglet welfare during farrowing and lactation: *Emma M. Baxter, Animal Behaviour and Welfare Team, Animal and Veterinary Sciences Research Group, SRUC, UK; and Sandra A. Edwards, Newcastle University, UK*
5. Optimising pig welfare at the weaning and nursery stage: *Nicole Kemper, University of Veterinary Medicine Hannover, Germany*
6. Optimizing pig welfare in the growing and finishing stage: *Arlene Garcia and John J. McGlone, Texas Tech University, USA*
7. Optimising pig welfare during transport, lairage and slaughter: *Luigi Faucitano, Agriculture and Agri-Food Canada, Canada; and Antonio Velarde, Institute of Agrifood Research and Technology, Spain*

Part 3 Current welfare issues

8. Evidence of pain in piglets subjected to invasive management procedures: *Armelle Prunier and Céline Tallet, PEGASE, INRAE, Institut Agro, France; and Dale Sandercock, Scotland's Rural College (SRUC), UK*

9. Alternatives to castration of pigs: *Emma Fàbrega, IRTA, Spain*
10. Understanding and preventing tail biting in pigs: *Sandra Edwards, Newcastle University, UK; and Anna Valros, University of Helsinki, Finland*
11. The role of enrichment in optimizing pig behaviour and welfare: *Sandra Döpjan and Liza R. Moscovice, Institute of Behavioural Physiology – Leibniz Institute for Farm Animal Biology Dummerstorf, Germany; and Birger Puppe, Institute of Behavioural Physiology – Leibniz Institute for Farm Animal Biology Dummerstorf and University of Rostock, Germany*

Part 4 Assessment of welfare states

12. Physiological and behavioral responses to disease in pigs: *M. D. Pairis-Garcia and B. K. Wagner, North Carolina State University, USA*
13. Assessing emotions in pigs: determining negative and positive mental states: *Eimear Murphy, Luca Melotti and Michael Mendl, Bristol Veterinary School, University of Bristol, UK*
14. Welfare assessment of pigs: *Björn Forkman, University of Copenhagen, Denmark*
15. Advances in technologies for monitoring pig welfare: *Maciej Oczak, University of Veterinary Medicine Vienna, Austria; Kristina Maschat, FFoQSI GmbH, Austria; and Johannes Baumgartner, University of Veterinary Medicine Vienna, Austria*
