About the book

This collection reviews the wealth of research on tropical forest management. The book explores key challenges facing tropical forests, as well as the ecosystem services they deliver. Later chapters review the management structures and techniques for sustainable forest management (SFM).

About the editors

Dr Jürgen Blaser is Professor of International Forestry and Climate Change at Bern University of Applied Sciences, Switzerland. Professor Blaser is a former Chair of the International Tropical Timber Organisation (ITTO) and former Senior Forestry Advisor at the World Bank.

Patrick D. Hardcastle is an internationally-respected Forestry Development Specialist with over 35 years' experience of forestry development and management. Pat has worked with organisations such as the ITTO, World Bank and the FAO.

Achieving sustainable management of tropical forests

Available in print and digital formats:

ISBN - print 978-1-78676-248-1

Pages 746

Pub. Date October 2020

Price £190/\$245/€230/C\$325

Series No AS80

Achieving sustainable management of tropical forests

Edited by: Professor Jürgen Blaser, Bern University of Applied Sciences, Switzerland and Patrick D. Hardcastle, Forestry Development Specialist, UK

Part 1 Challenges faced by tropical forests

1. An overview of tropical forest formations: *Alice Muchugi, World Agroforestry (ICRAF), Kenya; Sammy Muraguri, Kunming Institute of Botany, China; et al.*
2. Pressures on tropical forests: agriculture, trade and illegality: *Duncan Brack, Royal Institute of International Affairs (Chatham House), UK*
3. Narratives on the Sustainable Development Goals (SDGs) and tropical forests: *Wil de Jong, Kyoto University, Japan; and Glenn Galloway, University of Florida, USA*
4. National governance and tropical forests: key challenges: *Mafa E. Chipeta, African Forest Forum (AFF), Malawi*
5. Climate change and tropical forests: *Rodney J. Keenan, The University of Melbourne, Australia*

Part 2 Ecosystem services provided by tropical forests

6. New types of products from tropical wood: *Jegatheswaran Ratnasingam, Universiti Putra Malaysia, Malaysia*
7. Non-timber forest products from tropical forests: *Alida O'Connor, University of British Columbia, Canada; and Terry C. H. Sunderland, University of British Columbia, Canada and Centre for International Forestry Research, Indonesia*
8. Ecosystem services delivered by tropical forests: regulating services of tropical forests for climate and hydrological cycles: *Oliver Gardi, Bern University of Applied Sciences and School of Agricultural, Forest and Food Sciences HAFL, Switzerland*
9. Biodiversity and ecosystem services in tropical forests: recent findings and implications for sustainable forest management (SFM): *Beth A. Kaplin, University of Rwanda, Rwanda and University of Massachusetts-Boston, USA*
10. Amenity and recreation values of tropical forests: an ecosystem services perspective: *Gamini Herath, Monash University, Malaysia*

Part 3 Management structures to support sustainable forest management (SFM)

11. Defining sustainable forest management (SFM) in the tropics: *Francis E. Putz, University of Florida-Gainesville, USA; and Ian D. Thompson, Thompson Forest Ltd.-Kelowna, Canada*
12. Improving operating standards in sustainable forest management of tropical forests in Africa: *Paxie W. Chirwa, University of Pretoria, South Africa; Oghenekwe Arabomen, Forestry Research Institute of Nigeria, Nigeria; et al.*
13. The role of certification schemes in sustainable forest management (SFM) of tropical forests: *James Sandom, formerly Woodmark Scheme/Responsible Forest Programme – Soil Association, UK*

14. Tenure and management rights in tropical forests: *Chloe Ginsburg, Stephanie Keene, Alain Frechette and Andy White, Rights and Resources Initiative, USA*
15. Community-based management of tropical forests: lessons learned and implications for sustainable forest management: *Liz Ota, Sharif A. Mukul, Nestor Gregorio and John Herbohn, Tropical Forests and People Research Centre – University of the Sunshine Coast, Australia*

Part 4 Monitoring and management techniques in sustainable forest management (SFM)

16. New techniques for assessing and mapping tropical forests: *Michael Köhl, Philip Mundhenk and Prem Raj Neupane, Universität Hamburg, Germany*
17. Advances in monitoring and reporting forest emissions and removals in the context of the United Nations Framework Convention on Climate Change (UNFCCC): *Marieke Sandker and Till Neeff, Food and Agriculture Organization of the United Nations (FAO), Italy*
18. Understanding and exploiting genetics of tropical tree species for restoration of tropical forests: *Reiner Finkeldey, Kassel University, Germany; et al.*
19. Pathogens in tropical forests: diversity and management: *Steve Woodward, University of Aberdeen, UK; et al.*
20. The role of agroforestry in sustainable forest management (SFM) of tropical forests: *Lindsey Norgrove, Tabea Allen and Ata Davatgar, Bern University of Life Sciences, Switzerland*

Part 5 Sustainable forest management (SFM) of different types of tropical forest

21. Forest landscape restoration (FLR) of tropical forests: *Stephanie Mansourian, Mansourian.org/University of Geneva, Switzerland/IUFRO, Austria*
22. Sustainable management of tropical plantation forests: *Jonathan C. Onyekwelu, The Federal University of Technology, Nigeria*
23. Sustainable forest management (SFM) of tropical moist forests: the Congo Basin: *Paolo Omar Cerutti and Robert Nasi, Center for International Forestry Research (CIFOR), Kenya and Indonesia*
24. Sustainable forest management (SFM) of tropical moist forests: the case of the Brazilian Amazon: *Edson Vidal, University of São Paulo (ESALQ/USP), Brazil, et al.*
25. Sustainable management of African dry forests: *G. Kowero and H.-N. Bouda, African Forest Forum, Kenya*

Part 6 The Future

26. Achieving sustainable management of tropical forests: overview and conclusions: *Jürgen Blaser, Bern University of Applied Sciences, Switzerland; et al.*
