

Delivering knowledge for the global scientific community

There has never been a greater need for research in agricultural science. The Food and Agriculture Organisation (FAO) has predicted a potential 60% increase in the demand for food by 2050 as the population reaches 9 billion.

Burleigh Dodds Science Publishing is an independent and innovative publisher delivering high quality customer focussed agricultural science content in print and online formats for the academic and research communities.

Burleigh Dodds - we're different

Burleigh Dodds is built on a reputation of experience, engagement and innovation. We pride ourselves on our customer focussed approach.

Separating the 'wheat from the chaff'

When it comes to information, particularly in the digital world, are we able to separate the 'wheat from the chaff'? In his [video blog](#) Francis explains the challenges researchers face with information overload.

Tomatoes in the news

As Burleigh Dodds welcomes editors Dr Avtar Mattoo and Prof. Avtar Handa to our publication *Achieving Sustainable Tomato Cultivation*, we wanted to share the latest research by Wageningen UR and Proeftuin Zwaagdijk in The Netherlands.
